Attachment ID plate:
Each CBI attachment is identified by a model number and serial number which is attached to the unit before shipment. This plate also includes capacity, and attachment weight.

Forklift Capacity Plate:
Forklift capacity plate should be updated to include this specific attachment. The capacity of the truck and attachment combination may be less that the capacity for the forklift only.

Safety:
• Check your equipment before you operate it.
• Never stand under attachment, or in operating range.
• When removing demountable attachments always keep hands and feet free from dangerous positions and pinch points.
• Check to ensure that attachment is securely installed on forklift before use.
• Do not use the attachment for any other purpose than indicated.

Preventative Maintenance
CBI Attachments have been constructed to require very little attention. But there are some measures which can be taken to ensure the long life of your CBI Equipment. Perform these checks before each use.
• Check mounting parts for wear, repair or replace if needed.
• Check all bolts and welds for cracking, stress, or wear.
• Check for damage from previous use.

Warranty:
CBI products are warranted for one year. Products are guaranteed to be free from defects in material and workmanship and that, if the equipment or any part thereof is returned to an authorized dealer, transportation charges prepaid, and, if examination discloses to its satisfaction that the said equipment, part or parts has been defective in workmanship or material, CBI will deliver to purchaser without charge, transportation prepaid, parts of first class workmanship and material in exchange for any parts so found to be defective and its obligation is limited to said exchange. CBI shall not be liable for any repairs or alterations except those made with its written consent and shall not be liable for damages from delay or loss of use or for other indirect or consequential damages, losses or expenses of any kind. It is specifically agreed that the liability of CBI under all guarantees, either express or implied, is strictly limited to those terms as hereinbefore provided.

Repairs and required maintenance:
Attachments should not be disassembled without first consulting your authorized CBI Attachments dealer. Replacement parts are available, and are listed in the pages that follow.

Service and Support:
We are here to help. For information about parts, service, or a warranty claim, call 1-800-547-3131 or reach us through email at customerservice@cbimfg.com
CBI Tarp Spreader Installation:

Before installing the CBI Tarp Spreader Attachment on your lift truck, visually check to see that all welds are intact, and that mounting hardware has not become damaged or loosened during shipment.

CBI Tarp Spreader Attachments come with a heavy duty pin to secure the boom into the base, as well as two anchor pins for your use when attaching a tarp to the unit. (Figure B) The center pin shall always be securely in place when moving the attachment. (Figure A)

The nature of this attachment causes it to be off balance when the pole is in working position, and can result in the attachment tipping over. This alone is not detrimental to the attachment or its operation, but can cause problems when installing, removing, or storing the attachment.

For your convenience, we have provided a second pin hole in the center of the pole which allows the pole to be centered and secured for installation, removal, travel, and storage. The first hole is for the usage position. (Figure B)

The Tarp Spreader comes with two safety chains. Both safety chains shall be secured to the forklift carriage at all times when the attachment is installed or in use.

A CBI tarp spreader can be used on either the right or left side. Simply remove the pole, rotate 180°, and twist 90° so that the pin hole will line up with the base, and insert from the other side to reverse the working side. (Figure C)
**Tarp Spreader usage:**

Tarp Spreader attachments are long and off balance. Additional care must be exercised when using tarp spreader attachments:

- Be aware of your surroundings
- Keep loads under 475 Lbs
- Never use for other applications
- Limit cornering speeds
- Always wear your seat belt
- Observe all safety policies and practices

Lower all the way down and attach your tarp to the provided hooks.

Slowly raise until the pole and tarp clears your load.

Proceed forward until the tarp is completely over the load and disconnect the attachment.

Your new CBI attachment will give you years of service when used properly. We strive to be an industry leader in wide load handling, and specialty forklift attachments. Do not hesitate to call with questions or concerns.
